

You must perform these tasks for next round.

Problem Statement

You have simple problem of creating frontend for this backend api using NextJS/RemixJS.

<https://github.com/kaustubha-chaturvedi/fastapi-ecommerce-api>

Feature Set for Frontend (Must Have)

1. List Products
 - 1.1. List all products.
 - 1.2. List (N) products at a time.
 - 1.3. List products within the price range.
 - 1.4. Sort products based on price.
2. Create a product.
3. Update a product.
4. Delete Products
 - 4.1. Delete one product.
 - 4.2. Delete multiple products (api can only delete one at a time).
5. List orders.
 - 5.1. List (N) orders.
6. Create order.
7. Update Order.
8. Delete/Cancel an order.

Marking Parameters

1. Quality of code.
2. Simplicity of approach.
3. User Friendly Design.

Bonus Points

1. Deploying code on Vercel/Netlify or any other place.
2. Using ShadCNs UI is a major bonus point.
3. Using Tailwind.
4. Creating frontend Dark Mode 😊.

How to Submit

Submit your completed task on this form.

To Submit you have to do following:

1. Save screenshot of each implemented feature in **results** directory.
2. Upload this directory along with code to public github repo.
3. Fill this form <https://forms.office.com/r/hGXMP9SEWY>
